GLOF ALERT

GLOF/Met-3(7)/2020/ 1337-1344

**Issue Date: 27th April, 2022
Issue Time: 10:00 AM**

The temperature in Gilgit-Baltistan and Khyber Pakhtunkhwa is expected to remain 05-07 °C higher above normal for coming 5 to 6 days creating heat wave type situation in glaciated regions of Gilgit-Baltistan and Khyber Pakhtunkhwa. It is more likely that this heat wave condition will enhance the melting rate of snow and ice which may trigger GLOF events/ Flash flood in the vulnerable area of G-B and KP. Specifically the probability of GLOF triggering episode from Shishper lake reformed in December, 2021 has increased. The role and activities of district governments, relevant local organizations and local communities are advised to remain more vigilant and observe precautionary measures.
